

Washington D.C.- Congressman Steve King (R-IA) and Congresswoman Michele Bachmann (R-MN) released the following pledge to House Republican Leadership calling for all \$105.5 billion in automatic appropriations to ObamaCare to be struck by the FY11 CR. King and Bachmann call upon all Members of the U.S. House of Representatives to sign onto the pledge to vote "NO" on any continuing resolution proposal that does not include language that cuts off the automatic funding that was written into ObamaCare by the Pelosi Congress in 2010.

Congress of the United States
Washington, DC 20515

Dear Speaker Boehner, Leader Cantor, and Chairman Rogers,

We very much appreciate your leadership in bringing H.R. 2 to the floor, which resulted in a unanimous Republican vote to repeal ObamaCare. This was an essential step in achieving our universal Republican goal to bring about the final, 100% repeal of this law. No strategy to accomplish this goal could succeed without this House vote.

From the moment legislation to repeal ObamaCare was first introduced, it has been widely discussed that a successful repeal strategy would center on first winning a Republican majority in the House, then holding a clean, up or down vote on repeal, and then prohibiting funding for the implementation or enforcement of ObamaCare. We must ensure that this strategy remains on track and on schedule.

The success of our effort to shut off funding for ObamaCare will hinge on the leverage points of this first session of the 112th Congress - namely the CR, which expires on March 18th, and the vote on raising the debt ceiling. We recognize the work to defund ObamaCare began with the inclusion of language in H.R. 1 to restrict annual appropriations from being used to implement the law. However, we also recognize that even this language, if enacted, leaves on the table \$105.5 billion in automatically appropriated funds for the law's implementation. We cannot successfully defund ObamaCare without shutting off these automatically appropriated funds.

While some have argued that our defunding efforts in the CR should be limited only to those annual funds actually provided by the CR, we disagree. If we do not stand our ground on the CR, leverage it as the "must pass bill" that it is, and use it to stop the \$105.5 billion in automatically appropriated funds, ObamaCare will be implemented on our watch. We will also have conceded a significant amount of ground on this issue and will find it difficult, if not impossible, to regain the strategic advantage in future legislative vehicles.

Consequently, we ask that the following language, or more effective language, be added to the FY11 CR to cut off both the annual and automatic appropriations for ObamaCare's implementation: "Notwithstanding any other provision of law, none of the funds made available by this or any previous Act with respect to any fiscal year may be used to carry out the provisions of Public Law 111-148, Public Law 111-152, or any amendment made by either such Public Law."

It is essential that the above language be included in the CR. We, the undersigned, will not vote in support of a continuing resolution that is void of this crucial funding prohibition.

Sincerely,
